

COMPTON FIBRE UPDATE

Dear Householder,

Great news

Fast fibre internet should be available to all of us in Attwoods Drove, Martins Fields and the western end of Compton Street before long.

Thanks to a couple of dozen residents and small businesses in Compton, we have already collected enough sign-ups to fund the project using the government's Rural Gigabit Voucher scheme.

What next?

- We form a limited company to sign the contract with Openreach.
- The Parish Council is supporting this with a grant.
- Details of the company to be agreed at the public meeting on 11 March

Compton Community Fibre Partnership

We apologise for the delay in distributing the original leaflet in Attwoods Drove

COMPTON COMMUNITY FIBRE PUBLIC MEETING

7:30 pm Wednesday 11 March 2020

In the Scout Hall, Martins Fields

We invite all Compton residents who can't get Superfast Broadband* to come and find out how our Community Fibre Partnership will deliver Ultrafast Fibre, funded by government vouchers.

If you've supported the scheme by signing up for a DCMS voucher, this is your chance to ask questions about the process.

We'll agree the details of the limited company to sign the contract with Openreach.

David Frampton of BT Openreach will be there to answer questions.

*That is, Attwoods Drove, Martins Fields and the western end of Compton Street
